

# CALL FOR PAPERS ISLPED 2020

## INTERNATIONAL SYMPOSIUM ON LOW POWER ELECTRONICS AND DESIGN

<http://www.islped.org>

Boston, MA, USA  
August 10 – 12, 2020

Follow us on Twitter: @islped

### Organizing Committee and Symposium Officers:

#### General Co-Chairs

David Atienza, EPFL  
[david.atienza@epfl.ch](mailto:david.atienza@epfl.ch)  
Qinru Qiu, Syracuse Univ.  
[qiqiu@syr.edu](mailto:qiqiu@syr.edu)

#### Program Co-Chairs

Sherief Reda, Brown Univ.  
[sherief\\_reda@brown.edu](mailto:sherief_reda@brown.edu)  
Yiran Chen, Duke Univ.  
[yiran.chen@duke.edu](mailto:yiran.chen@duke.edu)

#### Local Arrangements

Ayse K. Coskun, Boston Univ.  
[acoskun@bu.edu](mailto:acoskun@bu.edu)

#### Treasurer

Marina Zapater, EPFL  
[marina.zapater@epfl.ch](mailto:marina.zapater@epfl.ch)

#### Publication Chair

Kapil Dev, Nvidia  
[kdev@nvidia.com](mailto:kdev@nvidia.com)

#### Web/Registration Chair

Hiwot Tadese Kassa, UMICH  
[hiwot@umich.edu](mailto:hiwot@umich.edu)

#### Publicity Co-Chairs

Joerg Henkel, KIT  
[henkel@kit.edu](mailto:henkel@kit.edu)  
Tsung-Yi Ho, Tsing Hua Univ.  
[tyho@cs.nthu.edu.tw](mailto:tyho@cs.nthu.edu.tw)

#### Design Contest Co-Chairs

Pascal Meinerzhagen, INTEL  
[pascal.a.meinerzhagen@intel.com](mailto:pascal.a.meinerzhagen@intel.com)  
Ajay Joshi, Boston Univ.  
[joshi@bu.edu](mailto:joshi@bu.edu)

Pending sponsorship by the **ACM Special Interest Group on Design Automation (SIGDA)**, the **IEEE Circuits and Systems Society (CASS)** and the **IEEE Council on Electronic Design Automation (CEDA)**.

The International Symposium on Low Power Electronics and Design (ISLPED) is the premier forum for presentation of innovative research in all aspects of low power electronics and design, ranging from process technologies and analog/digital circuits, simulation and synthesis tools, system-level design and optimization, to system software and applications. Specific topics include, but are not limited to, the following three main tracks and sub-areas:

1. Technology, Circuits, and Architecture	2. CAD, Systems, and Software
<b>1.1. Technologies</b> Low-power technologies for device, interconnect, logic, memory, 2.5/3D, cooling, harvesting, sensors, optical, printable, biomedical, battery, and alternative energy storage devices.	<b>2.1. CAD Tools and Methodologies</b> CAD tools and methodologies for low-power and thermal-aware design addressing power estimation, optimization, reliability and variation impact on power, and power-down approaches at all levels of design abstraction: physical, circuit, gate, register transfer, behavior, and algorithm.
<b>1.2. Circuits</b> Low-power digital circuits for logic, memory, reliability, clocking, power gating, resiliency, near-threshold and sub-threshold, variability, and digital assist schemes; Low-power analog/mixed-signal circuits for wireless, RF, MEMS, AD/DA Converters, I/O, PLLs/DLLs, imaging, DC-DC converters, and analog assist schemes.	<b>2.2. Systems and Platforms</b> Low-power, power-aware, and thermal-aware system design including data-center power delivery and cooling, Platforms for SoCs, embedded systems, approximate and brain-inspired computing, Internet-of-Things (IoT), wearable computing, body-area networks, wireless sensor networks, and system-level power implications due to reliability and variability.
<b>1.3. Logic and Architecture</b> Low-power logic and microarchitecture for SoC designs, processor cores (compute, graphics and other special purpose cores), cache, memory, arithmetic/Signal processing, cryptography, variability, asynchronous design, and non-conventional computing.	<b>2.3. Software and Applications</b> Energy-efficient, energy-aware, and thermal-aware software and application design including scheduling and management, power optimizations through HW/SW interactions, and emerging software low-power applications.
3. Industrial Design Track	
ISLPED'20 solicits papers for an "Industrial Design" track to reinforce interaction between the academic research community and industry. Industrial Design track papers have the same submission deadline as regular papers and should focus on similar topics, but are expected to provide a complementary perspective to academic research by focusing on challenges, solutions, and lessons learnt while implementing industrial-scale designs. Industrial design papers that focus on any of the topics mentioned in the tracks above are welcome.	

**Submissions on new topics: emerging technologies, architectures/platforms, and applications are particularly encouraged.**

**Technical Paper Submission Deadlines:** Abstract registration by **March 16<sup>th</sup>, 2020, at 11:59pm PST (extended)**

Full paper due by **March 23<sup>rd</sup>, 2020, at 11:59pm PST (extended)**

**Invited Talk, Panel, and Embedded Tutorial Proposals Deadline:** April 13, 2020

**Notification of Paper Acceptance:** May 22, 2020

**Submission of Camera-Ready Papers:** June 22, 2020

Submissions should be full-length papers of **up to 6 pages** (PDF format, double-column, US letter size, using the ACM Conference format, available at <https://www.acm.org/publications/proceedings-template>) including all illustrations, tables, references, and an abstract of no more than 250 words. **Submissions must be anonymous.** Submissions exceeding 6 pages or identifying the authors, either directly or through explicit references to their prior work, will be automatically rejected. More information about paper submission can be found at <http://www.islped.org>.

Submitted papers must describe original work that has not been published/accepted or currently under review by another journal, conference, symposium, or workshop. Accepted papers will be submitted to the IEEE Xplore Digital Library and the ACM Digital Library. ISLPED'20 will present two Best Paper Awards based on the ratings of reviewers and a panel of judges.

**ISLPED also features a Low Power Design Contest** with live demonstrations and awards. Submissions are due on May 15<sup>th</sup>, 2020. For details see the separate call for design contest participation available on the conference web page.

There will be several invited talks by industry and academic thought leaders on key issues in low power electronics and design. The Symposium may also include embedded tutorials to provide attendees with the necessary background to follow recent research results, as well as panel discussions on future directions in low power electronics and design. Proposals for invited talks, embedded tutorials, and panels should be sent by email to the ISLPED'20 Technical Program Co-Chairs, Sherief Reda ([sherief\\_reda@brown.edu](mailto:sherief_reda@brown.edu)) and Yiran Chen ([yiran.chen@duke.edu](mailto:yiran.chen@duke.edu)) by the deadline listed above.

**Participants interested in exhibiting at the Symposium should contact the General Co-Chairs by May 1, 2020.**
